I am in receipt of your letter of October 26, 2006 requesting copies of information that we may have received in response to our request of August 7, 2007 concerning laboratory documentation related to prior and subsequent test results of Mr. Landis. As I indicated in my letter of October 9, 2006, we anticipate receiving additional information in the near future and will forward a set of information to you once we have compiled it and bates labeled it accordingly.

You state in your October 26, 2006 letter that your client will be prejudiced in preparing his defense if he does not immediately receive information that we may received in response to our request; however, you fail to provide any basis for this assertion. I informed you in writing on October 13, 2006 that we will provide you a copy of the documents we intend to rely on concerning his prior and subsequent test results as soon as it is compiled, but at the very latest at the time our exhibits are due. Of course, you will have ample time to respond to any such documents.

As you might imagine and as you should recall from several other USADA cases that you have been involved with, the most effective way for all involved to exchange documents is for them to be bates labeled and as complete as possible at the time they are exchanged. Given that we anticipate receiving additional information in the very near future and that you will have ample time to respond to the documents, unless you are able to persuade us otherwise, we will provide you the information once we compile and bates label the set.

Feel free to contact me if you have any questions or concerns about this matter or to provide an explanation of exactly how your client will be prejudiced as you claim if he does not immediately receive what we have compiled thus far.

Sincerely,

Travis T. Tygart
